

NASTAVNO-NAUČNOM VEĆU
TEHNOLOŠKO-METALURŠKOG FAKULTETA
UNIVERZITETA U BEOGRADU

Na sednici Nastavno-naučnog veća Tehnološko-metalurškog fakulteta u Beogradu održanoj 21. septembra 2017. imenovani smo za članove Komisije za podnošenje izveštaja o ispunjenosti uslova za sticanje naučno-istraživačkog zvanja VIŠI NAUČNI SARADNIK kandidata dr Ane Janković, dipl. inž. tehnologije.

O navedenom kandidatu Komisija podnosi sledeći

IZVEŠTAJ

1.1 BIOGRAFSKI PODACI

Ana D. Janković je rođena 24.12.1972. godine, u Jagodini, Republika Srbija. Završila je VIII beogradsku gimnaziju u Beogradu. Diplomirala je 2000. godine Tehnološko-metalurškom fakultetu Univerziteta u Beogradu na odseku za Biohemisko inženjerstvo i biotehnologiju. Srednja ocena tokom studija je 8,08.

Po diplomiranju, od septembra 2000. godine, godinu dana je bila zaposlena na Tehnološko-metalurškom fakultetu kao asistent-pripravnik na Katedri za opštu i neorgansku hemiju.

Godine 2001. dobija punu stipendiju za doktorske studije na „Wayne State University“, Detroit, Mičigen, SAD. Doktorsku disertaciju pod nazivom “Isothermal Titration Calorimetry Studies of Protein-mediated Interactions and Preliminary Structural Studies of Tandem PDZ1-2 Domain of PSD-95 Protein” odbranila je decembra 2009. godine na „Department of Chemistry, Wayne State University“, Detroit, MI, SAD, pod rukovodstvom mentora Dr Mark Spaller-a. Komisija Univerziteta u Beogradu za priznavanje stranih visokoškolskih isprava donela je rešenje 19.04.2012. kojim se diploma priznaje kao diploma akademskih studija (doktor nauka-hemijske nauke).

Tokom studija radila je kao Graduate Research Assistant od novembra 2001. godine do novembra 2007. godine, a kao Graduate Teaching Assistant od septembra 2001. godine do maja 2005. godine, na „Department of Chemistry, Wayne State University“, Detroit, MI, SAD. U periodu od februara 2008. do juna 2009. radila je kao Research Assistant na „Department of Biochemistry and Molecular Biology, School of Medicine, Wayne State University“, Detroit, MI, SAD. U toku studija dva puta je nagradjivana Wayne State University Excellence in Teaching Award, 2004. i 2005. godine.

Ana Janković bila je zaposlena od 9.01.2012. na Tehnološko-metalurškom fakultetu Univerziteta u Beogradu na projektu REGPOT-FP7 “Reinforcing of Nanotechnology and Functional Materials Centre” (No: 245916) u trajanju od 01.01.2010 do 31.12.2012. Projekat je realizovan u okviru Centra za nanotehnologije i funkcionalne materijale pri Tehnološko-metalurškom fakultetu Univerziteta u Beogradu. U okviru ovog projekta boravila je na NILPRP-The Laser-Surface-Plasma Interactions Laboratory, National Institute for Laser, Plasma, and Radiation Physics u Bukureštu, Rumunija, u periodu od 17.04.2012. do 31.05.2012, zatim od 1.10.2012 do 14.10.2012 i od 29.10.2012 do 15.11.2012. Od 01.03.2013. zaposlena je u Inovacionom centru TMF-a i angažovana sa 12 istraživačkih meseci na projektu Ministarstva prosvete, nauke i tehnološkog razvoja pod nazivom „Sinteza, razvoj tehnologija dobijanja i primena nanostruktturnih multifunkcionalnih materijala definisanih svojstava“, sa evidencionim brojem III45019. Dr Ana Janković izabrana je u zvanje naučni saradnik 12.06.2013.

Dr Ana Janković do sada ima objavljena dva rada u međunarodnim časopisima izuzetnih vrednosti, devet radova u vrhunskim međunarodnim časopisima, dva rada u istaknutim međunarodnim časopisima, dva rada u međunarodnim časopisima i jedan rad u međunarodnom časopisu van SCI liste, petnaest naučnih saopštenja u zbornicima međunarodnih skupova i četiri naučna saopštenja u zborniku nacionalnog skupa (spisak referenci je u prilogu). Do sada ima dva objavljena i dva prijavljena patentna na nacionalnom nivou.

Pohađala je međunarodni Workshop, CCP4 school: From data processing to structure refinement and beyond, na APS, Argonne Laboratory, Chicago, USA u periodu 23/05/2008 - 28/05/2008.

Govori tečno engleski jezik. Član je Srpskog hemijskog društva.

1.2 NAUČNO-ISTRAŽIVAČKI RAD

Naučno-istraživački rad dr Ane Janković u toku boravka u SAD na izradi doktorske disertacije bio je fokusiran na proteinsku biohemiju, specifično na slabe međuproteinske interakcije. Istraživanja su se fokusirala na postsinaptičke proteine za koje je interakcija protein-mali molekul ili protein-peptid karakterisana mikrokalorimetrijskom metodom. Ispitivana je termodynamika interakcija tandem PDZ domena proteina PSD-95 sa peptidno-baziranim ligandima, kao i kristalizaciju sa preliminarnim X-ray kristalografskim istraživanjima istog dual proteinskog domena. Strukturne studije su se oslanjale primarno na metodu proteinske kristalografske X-zracima, karakterizaciju afiniteta jona gvožđa ka frataksin proteinu pomoću titracione kalorimetrije, kao i strukturno određivanje metalo-proteina na nivou atoma koristeći X-ray apsorpcionu spektroskopiju i iz ove problematike je objavljen jedan rad u vrhunskom međunarodnom časopisu (M21) i odbranjena doktorska disertacija.

Drugi deo istraživanja, po povratku na Univerzitet u Beogradu, odnosi se na dobijanje i karakterisanje elektroforetskih biokompozitnih prevlaka na metalima, primarno elektroforetskih prevlaka hidroksiapatita dopiranih srebrom, kao i biokompozitnih Ag/hidroksiapatit/lignin prevlaka na titanu i ispitivanje uticaja koncentracije lignina na morfologiju, strukturu i termičko ponašanje Ag/hidroksiapatit/lignin prevlaka. U okviru ovog dela projekta posebno je značajna naučna saradnja sa Département des sciences du bois et de la forêt, Université Laval, Québec, Canada. Ispitivana su antimikrobna svojstva i citotoksičnost biokompozitnih Ag/hidroksiapatit/lignin prevlaka i utvrđeno je da optimalna koncentracija lignina od 1 mas. % nije citotoksična za ispitane periferne ćelije krvi. Do sada su iz ove problematike objavljena tri rada u vrhunskim međunarodnim časopisima (3M21) i rad u časopisu međunarodnog značaja (1M23), pet radova saopšteno je na skupovima međunarodnog značaja štampana u izvodu (5M34), kao i jedan rad saopšten na skupu nacionalnog značaja štampan u izvodu (1M64).

U okviru međunarodnog REGPOT-FP7 projekta "Reinforcing of Nanotechnology and Functional Materials Centre" (No: 245916) ostvarena su tri studijska boravka tokom 2012. godine na NILPRP-The Laser-Surface-Plasma Interactions Laboratory, National Institute for Laser, Plasma and Radiation Physics u Bukureštu, Rumunija. Istraživanja na sistemu biokompozita Ag/hidroksiapatit/lignin podrazumevaju nanošenje tankih filmova na pločice titana tehnikama Pulsed Laser Deposition (PLD) i Matrix Assisted Pulsed Laser Evaporation (MAPLE). Istraživanja su bila fokusirana na antimikrobno dejstvo prevlaka dobijenih laser depozicijom na titanu. Testirani su sojevi *Staphylococcus aureus*, *Pseudomonas aeruginosa* i *Candida famata*. Utvrđeno je da su biokompozitne hidroksiapatit/lignin prevlake dopirane srebrom pokazale baktericidni efekat, naročito prema *C. famata*. Iz ove oblasti istraživanja objavljen je jedan rad u vrhunskom međunarodnom časopisu (1M21), jedan rad u istaknutom međunarodnom časopisu (1M22), kao i četiri saopštenja sa međunarodnih skupova štampanih u izvodu (4M34).

U toku 2013. godine započeta je saradnja sa laboratorijom Prof. Kyong Yop Rhee, Department of Mechanical Engineering, Kyung Hee University, Seul, Južna Koreja. Fokus ovih istraživanja je upotreba grafena, naročito u svrhu dobijanja i karakterisanja elektroforetskih prevlaka hidroksiapatita dopiranih srebrom, kao i biokompozitnih Ag/hidroksiapatit/grafen prevlaka na titanu. Uticaj grafena kao materijala budućnosti, veoma je značajan na morfologiju, strukturu i termičko ponašanje Ag/hidroksiapatit/grafen prevlaka i detaljno je karakterisan sledećim metodama SEM, FE-SEM, TGA, Raman spektroskopija, FTIR, XPS i XRD. Citotoksičnost biokompozitnih Ag/hidroksiapatit/grafen prevlake ispitivana je pri koncentraciji grafena od 1 mas. % u konačnoj masi prevlake za ispitane periferne ćelije krvi. Ispitivana je i antimikrobna aktivnost dobijenih prevlaka na bakterijskim sojevima *Staphylococcus aureus* i *Escherichia coli* metodom preživljavanja u rastvoru i agar difuzionim testom. Rezultati su veoma ohrabrujući jer su prevlake dopirane srebrom pokazale odlična baktericidna

svojstva već u prva 3h nakon inkubacije, što potvrđuje sposobnost sprečavanja nastanka biofilma, ključnu osobinu za sve antibakterijske implantate. Zona inhibicije je naročito izražena oko uzoraka Ag/hidroksiapatit/grafen u slučaju *S.aureus*. Iz ove oblasti istraživanja objavljena su dva rada u vrhunskom međunarodnom časopisu (2M21), jedan rad u istaknutom međunarodnom časopisu (1M22), kao i šest saopštenja sa međunarodnih skupova štampanih u izvodu (6M34). Tokom 2015. istraživanja su proširena i u smeru uključivanja polimera i formiranje novih kompozita. Izbor je bio prirodni polimer hitozan, te je postupak dobijanja i potpuna karakterizacija na ovaj način dobijenog hidroksiapatit/hitozan/grafen kompozita objavljen kao nacionalni patent (1M94), a potom i u vrhunskom međunarodnom časopisu (1M21). Najnovija istraživanja fokusirana su na implementaciju izabranog antibiotika-gentamicina i njegovo uključivanje u kompozitnu prevlaku. Optimizacija i postupak dobijanja su veoma novi i kao takvi prijavljeni su kao patenti na nacionalnom nivou (2M87).

Istraživanja su nastavljena i u oblasti elektrohemijske sinteze hidrogelova na bazi nanokompozita polivinil-alkohola sa nanočesticama srebra, optimizacija uslova elektrohemijske sinteze nanočestica srebra u hidrogelovima polivinil-alkohola (PVA), sa i bez grafena (Ag/PVA/Gr i Ag/PVA), određivanje morfologije i elektrohemijskih karakteristika dobijenih hidrogelova i ispitivanje kinetike otpuštanja srebra, citotoksičnosti i antibakterijskih svojstava nanokompozitnih hidrogelova za potencijalnu primenu u medicini kao implanti mekih tkiva. Dobijeni hidrogelovi su netoksični i sa izraženim antibakterijskim svojstvima. Specifičnosti inkorporisanja grafena u svrhu poboljšanja pre svega mehaničkih svojstava, u postupku su zaštite kao novi proizvod i objavljen je patent na nacionalnom nivou (1M94). Ova istraživanja rezultirala su objavljinjem dva rada u međunarodnim časopisima izuzetnih vrednosti (2M21a) i jednog rada u vrhunskom međunarodnom časopisu (1M21), kao i jednog rad u međunarodnom časopisu (1M23).

Tokom svog istraživačkog rada aktivno je učestvovala u realizaciji 2 doktorske disertacije; kandidata Mohamed Mohamed Abudabbus za izradu doktorske disertacije pod nazivom “Electrochemical synthesis and characterization of poly(vinyl alcohol) nanocomposites with silver nanoparticles” i kandidata Radeta Surudžića za izradu doktorske disertacije pod nazivom “Elektrohemijska sinteza i karakterizacija nanokompozita polivinil-alkohola, grafena i nanočestica srebra” kao član Komisije za ocenu podobnosti teme i kandidata na Tehnološko-metalurškom fakultetu Univerziteta u Beogradu.

2. SPISAK NAUČNIH RADOVA KANDIDATA

2.1. RADOVI OBJAVLJENI U NAUČNIM ČASOPISIMA MEĐUNARODNOG ZNAČAJA – M20

2.1.1. Rad u međunarodnom časopisu izuzetnih vrednosti - M21a (2x10=20)

Posle izbora u prethodno zvanje:

2.1.1.1. M.M. Abudabbus, I. Jevremović, **A. Janković**, A. Perić-Grujić, I. Matić, M. Vukašinović-Sekulić, D. Hui, K.Y. Rhee, V. Mišković-Stanković, Biological activity of electrochemically synthesized silver doped polyvinyl alcohol/graphene composite hydrogel discs for biomedical applications, *Compos Part B-Eng* **104** (2016) 26-34. (Materials Science, Composites, 2/25, IF (2016) = 4,727), ISSN 1359-8368. Publisher: Elsevier

<http://www.sciencedirect.com/science/article/pii/S1359836816302943>

2.1.1.2. Rade Surudžić, **Ana Janković**, Natasa Bibić, Maja Vukašinović-Sekulić, Aleksandra Perić-Grujić, Vesna Mišković-Stanković, Soo Jin Park, Kyong Yop Rhee, “Physico-chemical and mechanical properties and antibacterial activity of silver/poly(vinyl alcohol)/graphene nanocomposites obtained by electrochemical method”, *Compos Part B-Eng* **85** (2016) 102–112. (Materials Science, Composites, 2/25, IF (2016) = 4,727), ISSN 1359-8368. Publisher: Elsevier

2.1.2. Rad u vrhunskom međunarodnom časopisu – M21 (9x8=72)

Posle izbora u prethodno zvanje:

2.1.2.1 M. Đošić, S. Eraković, A. Janković, M. Vukašinović-Sekulić, I. Z. Matić, J. Stojanović, K. Y. Rhee, V. Mišković-Stanković, S. J. 3. ANALIZA PUBLIKOVANIH RADOVA

Dr Ana Janković do sada ima objavljena dva rada u međunarodnim časopisima izuzetnih vrednosti (**2M21a**), devet radova u vrhunskim međunarodnim časopisima (**9M21**), dva rada u istaknutim međunarodnim časopisima (**2M22**), dva rada u međunarodnim časopisima (**2M23**) i jedan rad u međunarodnom časopisu van SCI liste, petnaest naučnih saopštenja u zbornicima međunarodnih skupova (**15M34**) i četiri naučna saopštenja u zborniku nacionalnog skupa (**4M64**) (spisak referenci je u prilogu). Do sada ima dva objavljena (**2M94**) i dva prijavljena (**2M87**) patentna na nacionalnom nivou.

Radovi i saopštenja koje je do sada publikovala Ana Janković mogu da se podele u nekoliko grupa, na osnovu tema istraživanja i rezultata koji su u njima prikazani.

U okviru izrade doktorske teze na Wayne State University naučno-istraživački rad kandidata obuhvatio je studije termodinamike interakcija tandem PDZ domena proteina PSD-95 sa peptidno-baziranim ligandima, kao i kristalizaciju sa preliminarnim X-ray kristalografskim istraživanjima istog dual proteinskog domena, karakterizaciju afiniteta jona gvožđa ka frataksin proteinu pomoću titracione kalorimetrije, kao i strukturno određivanje metalo-proteina na nivou atoma koristeći X-ray Absorpcionu Spektroskopiju. Iz ove problematike je objavljen štampani rad (**1M21**) **2.1.2.9** i odbranjena doktorska disertacija **2.4.1**.

Drugi deo istraživanja se odnosi na dobijanje i karakterisanje elektroforetskih prevlaka hidroksiapatita dopiranih srebrom, kao i biokompozitnih Ag/hidroksiapatit/lignin prevlaka na titanu i ispitivanje uticaja koncentracije lignina na morfologiju, strukturu i termičko ponašanje Ag/hidroksiapatit/lignin prevlaka. Ispitivana su antimikrobna svojstva i citotoksičnost biokompozitnih Ag/hidroksiapatit/lignin prevlaka i utvrđeno je da optimalna koncentracija lignina od 1 mas. % nije citotoksična za ispitane periferne ćelije krvi. Takođe, krajnji cilj istraživanja je ispitivanje korozione stabilnosti biokompozitnih hidroksiapatit/lignin prevlaka, sa i bez srebra, pre i nakon termičkog tretmana, u simuliranoj telesnoj tečnosti na temperaturi od 37 °C. Sinterovane prevlake su se pokazale da imaju izuzetnu korozionu stabilnost u poređenju sa nesinterovanim prevlakama. Iz ove problematike objavljena su tri rada u vrhunskim međunarodnim časopisima (**3M21**) **2.1.2.6**, **2.1.2.7**, **2.1.2.8** objavljen rad u međunarodnom časopisu (**1M23**) **2.1.4.2**, a na međunarodnim naučnim skupovima saopšteni radovi (**5M34**) **2.2.1.12**, **2.2.1.13**, **2.2.1.14**, **2.2.1.15**, **2.2.1.1** i na nacionalnom naučnom skupu saopšten rad (**1M64**) **2.3.1.4**.

U okviru studijskih boravaka tokom 2012. godine na NILPRP-The Laser-Surface-Plasma Interactions Laboratory, National Institute for Laser, Plasma and Radiation Physics u Bukureštu,

Rumunija primenjena je tehnika laserski asistirane depozicije i formiranja taknih prevlaka ovom naprednom metodom. Istraživanja na sistemu biokompozita Ag/hidroksiapatit/lignin podrazumevaju nanošenje tankih filmova na pločice titana tehnikama Pulsed Laser Deposition (PLD) i Matrix Assisted Pulsed Laser Evaporation (MAPLE). Potpuna je fizičko-hemijska karakterizacija je urađena na NILPRP, Rumunija. Istraživanja su bila fokusirana na antimikrobnog dejstvo prevlaka dobijenih laser depozicijom na titanu. Testirani su sojevi *Staphylococcus aureus*, *Pseudomonas aeruginosa* i *Candida famata*. Utvrđeno je da su biokompozitne hidroksiapatit/lignin prevlake dopirane srebrom pokazale baktericidni efekat, naročito prema *C. famata*. Iz ove oblasti istraživanja objavljen je jedan rad u vrhunskom međunarodnom časopisu (1M21) 2.1.2.5, jedan rad u istaknutom međunarodnom časopisu (1M22) 2.1.3.1, kao i četiri saopštenja sa međunarodnih skupova štampanih u izvodu (4M34) 2.2.1.8, 2.2.1.9, 2.2.1.10 i 2.2.1.11.

Treća grupa radova odraz je istraživanja čiji je fokus upotreba grafena, naročito u svrhu dobijanja i karakterisanja elektroforetskih prevlaka hidroksiapatita dopiranih srebrom, kao i biokompozitnih Ag/hidroksiapatit/grafen prevlaka na titanu. Sve prevlake taložene su iz etanolskih suspenzija. Grafen je od 2004. godine predstavljen kao materijal budućnosti, te je potencijalno veoma je značajan njegov uticaj na morfologiju, strukturu i termičko ponašanje Ag/hidroksiapatit/grafen prevlaka i detaljno je karakterisan sledećim metodama SEM, FE-SEM, TGA, Raman spektroskopija, FTIR, XPS i XRD. Dokazano je formiranje novog sloja apatita, što ukazuje na biološki rast karbonatnog HAP-a tokom samo 7 dana potapanja u SBF. Ova bioaktivnost Ag/HAP/Gr kompozitne prevlake detaljno je karakterisana EIS, kao i rezultatima XRD i FE-SEM. Citotoksičnost biokompozitnih Ag/hidroksiapatit/grafen prevlaka ispitivana je pri koncentraciji grafena od 1 mas. % u konačnoj masi prevlake za ispitane periferne ćelije krvi. Ispitivana je i antimikrobna aktivnost dobijenih prevlaka na bakterijskim sojevima *Staphylococcus aureus* i *Escherichia coli* metodom preživljavanja u rastvoru i agar difuzionim testom. Rezultati su veoma ohrabrujući jer su prevlake dopirane srebrom pokazale odlična baktericidna svojstva već u prva 3h nakon inkubacije, što potvrđuje sposobnost sprečavanja nastanka biofilma, ključnu osobinu za sve antibakterijske implantate. Zona inhibicije je naročito izražena oko uzorka Ag/hidroksiapatit/grafen u slučaju *S.aureus*. Iz ove oblasti istraživanja objavljena su dva rada u vrhunskom međunarodnom časopisu (2M21) 2.1.2.3 i 2.1.2.4, jedan rad u istaknutom međunarodnom časopisu (1M22) 2.1.3.2, kao i šest saopštenja sa međunarodnih skupova štampanih u izvodu (6M34) 2.2.1.2, 2.2.1.3, 2.2.1.4, 2.2.1.5, 2.2.1.6, 2.2.1.7, kao i saopštenja sa nacionalnog skupa štampano u izvodu (1M64) 2.3.1.3.

Istraživanja bioaktivnih prevlaka na titanu su proširena i u smeru uključivanja polimera i formiranja novih kompozita. Izbor je bio prirodni polimer hitozan. Elektroforetska depozicija je uspešno primenjena za formiranje netoksičnih bioaktivnih kompozitnih prevlaka na bazi HAP, hitozana i grafena na Ti supstratima, a njihove interakcije su karakterisane analizama XRD, FT-IR, TG/DTG, FE-SEM i XPS. Promene veličine kristalita za HAP/CS i HAP/CS/Gr prevlake u odnosu na čist HAP, otkrivaju hemijske interakcije između HAP-a, hitozana i grafena, gde grafen deluje kao nanofiler u polimernoj matrici hitozana. Prevlaka HAP/CS/Gr pokazuje najveću otpornost na koroziju i najmanji stepen korozije u SBF-u, zbog biomimetičkog karbonatnog sloja HAP-a na njenoj površini. Obe kompozitne prevlake HAP/CS i HAP/CS/Gr su klasifikovane kao necitotoksične kada su testirane na zdravim PBMC ćelijama, a antibakterijska aktivnost protiv *S. aureus* i *E. coli* nije mogla biti potvrđena. Postupak dobijanja i potpuna karakterizacija na ovaj način dobijenog hidroksiapatit/hitozan/grafen kompozita objavljen kao nacionalni patent (1M94) 2.6.1.1, a potom i u vrhunskom međunarodnom časopisu (1M21) 2.1.2.1. Najnovija istraživanja fokusirana su na implementaciju izabranog antibiotika-gentamicina i njegovo uključivanje u kompozitnu prevlaku. Optimizacija i postupak dobijanja su veoma novi i kao takvi prijavljeni su kao patenti na nacionalnom nivou (2M87) 2.5.1.1 i 2.5.1.2. Nakon prijave, ova istraživanja su saopštена na nacionalnom skupu štampano u izvodu (1M64) 2.3.1.2, gde su privukla pažnju i osvojila nagradu IUPAC nagradu za postersku prezentaciju (1M104) 2.7.1.2.

Rad na problematici inkorporacije grafena u različite biomaterijale nastavljen je i na projektu elektrohemiske sinteze hidrogelova na bazi nanokompozita polivinil-alkohola sa nanočesticama srebra, optimizacija uslova elektrohemiske sinteze nanočestica srebra u hidrogelovima polivinil-alkohola (PVA), sa i bez grafena (Ag/PVA/Gr i Ag/PVA), određivanje morfologije i elektrohemiskih karakteristika dobijenih hidrogelova i ispitivanje kinetike otpuštanja srebra, citotoksičnosti i antibakterijskih svojstava nanokompozitnih hidrogelova za potencijalnu primenu u medicini kao implanti mekih tkiva. Dobijeni hidrogelovi su netoksični i sa izraženim antibakterijskim svojstvima. PVA/Gr nanokompozit je pokazao bolje mehaničke osobine (čvrstoća povećana za 56,0 % i Young-ov modul za 20,7%) i veću termičku stabilnost nego čist PVA. Hidrogel PVA/Gr je klasifikovan kao necitotoksičan u odnosu na zdrave mononuklearne ćelije periferne krvi (PBMC) prema MTT testu i pokazao snažnu antibakterijsku aktivnost protiv *S. aureusa*. Ag/PVA/Gr nanokompoziti pokazali su veću termičku stabilnost i bolje mehaničke osobine nego Ag/PVA nanokompoziti. Sporo otpuštanje srebra, kao i visok sadržaj ostatka srebra (76%) nakon 28 dana u simuliranoj telesnoj tečnosti potvrdili su da hidrogelovi Ag/PVA/Gr i Ag/PVA mogu sačuvati sterilnost tokom vremena. Ova karakteristika, zajedno sa njihovom snažnom antibakterijskom aktivnošću, ukazuje na to da su Ag/PVA / Gr i Ag/PVA hidrogelovi odlični kandidati za implantate mekog tkiva i obloge rane. Oba hidrogela, Ag/PVA i Ag/PVA/Gr značajno su smanjili preživljavanje bakterijskih ćelija nakon samo *S. aureus* i *E. coli* 1 h inkubacije u poređenju sa početnim brojem ćelija u suspenziji. Ag/PVA je smanjio broj kolonija *S. aureus* za logaritamske jedinice i za 2 logaritamske jedinice broj kolonija *E. coli*, dok je inkubacija sa Ag/PVA/Gr dovela do potpunog smanjenja *S. aureusa* i smanjenja od 5 logaritamskih jedinica *E. coli* kolonije. Ag/PVA je posle 24 h potpuno redukovao sve *S. aureus* kolonije i sve kolonije *E. coli* nakon 3 h. Nasuprot tome, Ag/PVA /Gr je potpuno redukova broj *S. aureus* TL i *E. coli* kolonija nakon 3 h i 24 h, redom. Veća antibakterijska aktivnost Ag/PVA/Gr od Ag/PVA mogla bi biti posledica manjih dimenzija čestica AgNP ugrađenih u hidrogelnu mrežu. Specifičnosti inkorporisanja grafena u svrhu poboljšanja pre svega mehaničkih svojstava, u postupku su zaštite kao novi proizvod i objavljen je patent na nacionalnom nivou (**1M94 2.6.1.2**). Ova istraživanja rezultirala su objavljinjem dva rada u međunarodnim časopisima izuzetnih vrednosti (**2M21a 2.1.1.1 i 2.1.1.2** i jednog rada u vrhunskom međunarodnom časopisu (**1M21 2.1.2.2**, jednog rada u međunarodnom časopisu (**1M23 2.1.4.1**, kao i saopštenja sa nacionalnog skupa štampano u izvodu (**1M64 2.3.1.1**. Važno je istaći i da su prezentovana istraživanja osvojila i dve međunarodne nagrade (**2M104**) i to Zlatna medalja sa likom Nikole Tesle u oblasti novih tehnologija-**2.7.1.3** i Zlatnu medalju na izložbi "New Time", Sevastopol, Rusija **2.7.1.1**.

3.1. LISTA PET NAJZNAČAJNIJIH NAUČNIH REZULTATA Dr Ane Janković

Rad u međunarodnom časopisu izuzetnih vrednosti - M21a

3.1.1 M.M. Abudabbus, I. Jevremović, **A. Janković**, A. Perić-Grujić, I. Matić, M. Vukašinović-Sekulić, D. Hui, K.Y. Rhee, V. Mišković-Stanković, Biological activity of electrochemically synthesized silver doped polyvinyl alcohol/graphene composite hydrogel discs for biomedical applications, *Compos Part B-Eng* **104** (2016) 26-34. 5. ELEMENTI ZA KVALITATIVNU OCENU NAUČNOG DOPRINOSA KANDIDATA I MINIMALNI KVANTITATIVNI USLOVI ZA IZBOR

5.1. Pokazatelji uspeha u naučnom radu

Pokazatelji uspeha u naučnom radu koji kvalifikuju kandidata dr Anu Janković u predloženom naučnom zvanju su:

- Koautor je dva rada u međunarodnim časopisima izuzetnih vrednosti (**2M21a**), devet radova u vrhunskim međunarodnim časopisima (**9M21**), dva rada u istaknutim međunarodnim časopisima (**2M22**), dva rada u međunarodnim časopisima (**2M23**) i jednog rada u međunarodnom časopisu van SCI liste, petnaest naučnih saopštenja u zbornicima međunarodnih skupova (**15M34**) i četiri naučna saopštenja u zborniku nacionalnog skupa (**4M64**) (spisak referenci je u prilogu). Do sada ima dva objavljenja (**2M94**) i dva prijavljena (**2M87**) patenta na nacionalnom nivou.
- Bila je član organizacionog odbora First International Conference on Processing, characterisation and application of nanostructured materials and nanotechnology (NanoBelgrade 2012), Belgrade, Serbia, 2012.
- Učestvovala je u istraživanjima u okviru međunarodnog TD COST Action TD1305: *Improved Protection of Medical Devices Against Infection (iPROMEDAI)*, European Cooperation in Science and Technology – COST, 2014-2018. u okviru koga je prisustvovala sastanku u Valletti, Malta 18.04-22.04.2017. godine.
- Učestvovala je u istraživanjima u okviru međunarodnog REGPOT-FP7 projekta “Reinforcing of Nanotechnology and Functional Materials Centre” (No: 245916) u okviru koga je imala tri studijska boravka tokom 2012. godine na NILPRP-The Laser-Surface-Plasma Interactions

Laboratory, National Institute for Laser, Plasma, and Radiation Physics u Bukureštu, Rumunija.

- Aktivno učestvuje na nacionalnom projektu III45019 Ministarstva prosvete, nauke i tehnološkog razvoja Republike Srbije pod nazivom: „Sinteza, razvoj tehnologija dobijanja i primena nanostruktturnih multifunkcionalnih materijala definisanih svojstava“, 2011-2017.
- Doktorska disertacija je urađena na „Wayne State University“, Mičigen, SAD u okviru koje je više puta boravila na „Brookhaven Natinonal Laboratory“, Upton, NY, SAD i na „SLAC National Accelerator Laboratory, Stanford University“, CA, SAD.

5.2. Razvoj uslova za naučni rad, obrazovanje i formiranje naučnih kadrova

Tokom svog dosadašnjeg naučno-istraživačkog rada dr Ana Janković je učestvovala u izradi eksperimentalnog dela, osmišljavanju toka i tumačenju rezultata doktorskih disertacija 2 kandidata, o čemini svedoče Odluke Nastavno-naučnih veća fakulteta o članstvu u Komisijama za ocenu podobnosti teme i kandidata ili pisanim zahvalnicama i zajedničkim publikovanim radovima sa kandidatima, proisteklih iz disertacija.

- Odlukom Nastavno-naučnog veća Tehnološko-metalurškog fakulteta Univerziteta u Beogradu br. 35/501 od 24.11.2016. god., dr Ana Janković je imenovana za člana Komisije za ocenu podobnosti teme i kandidata Mohamed Mohamed Abudabbus za izradu doktorske disertacije pod nazivom “Electrochemical synthesis and characterization of poly(vinyl alcohol)nanocomposites with silver nanoparticles”. Iz doktorske disertacije sa kandidatom je publikovan 1 rad kategorije M21a. (skenirani dokument u Prilogu A)
- Odlukom Nastavno-naučnog veća Tehnološko-metalurškog fakulteta Univerziteta u Beogradu br. 35/110 od 20.04.2017. god., dr Ana Janković je imenovana za člana Komisije za ocenu podobnosti teme i kandidata Radeta Surudžića za izradu doktorske disertacije pod nazivom “Elektrohemijska sinteza i karakterizacija nanokompozita polivinil-alkohola, grafena i nanočestica srebra”. Iz doktorske disertacije sa kandidatom je publikovan 1 rad kategorije M21a, 1 rad kategorije M21 i 1 rad kategorije M23. (skenirani dokument u Prilogu A)

Osim navedenih, učešće dr Ane Janković u izradi doktorske disertacije “Elektroforetsko taloženje i karakterizacija hidroksiapatit/ligin i srebro/hidroksiapatit/ligin prevlaka na titanu” dr Sanje Eraković, završnog master rada “Elektrohemski dobijanje i karakterizacija hidrogelova na bazi polivinil alkohola sa hitozanom, grafenom i nanočesticama srebra” master inž. Katarine Nešović, diplomskog rada “Elektroforetsko taloženje kompozitnih prevlaka hidroksiapatit/grafen i srebro/hidroksiapatit/grafen na titanu” dipl. inž. Jelene Marković i završnog rada “Elektroforetsko taloženje biokompozitnih keramičkih prevlaka hidroksiapatita i hitozana sa srebrom i gentamicinom na titanu za primene u medicini” dipl. inž. Ive Ilić, se može videti iz priloženih zahvalnica (skenirani dokumenti u Prilogu A). Iz doktorske disertacije dr Sanje Eraković sa kandidatom su publikovana 3 rada kategorije M21 i 1 rad kategorije M23.

Dr Ana Janković bila je član Komisije za izbor u naučno zvanje sledećih kandidata.

- Odlukom Nastavno-naučnog veća Tehnološko-metalurškog fakulteta Univerziteta u Beogradu br. 35/354 od 18.09.2015. god., dr Ana Janković je imenovana za člana Komisije za podnošenje izveštaja – referata o ispunjenosti uslova za izbor u istraživačko zvanje – NAUČNI SARADNIK za dr. Ivanu Jevremović, istraživača saradnika. (skenirani dokument u Prilogu A)
- Odlukom Nastavno-naučnog veća Tehnološko-metalurškog fakulteta Univerziteta u Beogradu br. 35/449 od 26.12.2013. god., dr Ana Janković je imenovana za člana Komisije za podnošenje izveštaja – referata o ispunjenosti uslova za izbor u istraživačko zvanje – NAUČNI SARADNIK za dr. Sanju Eraković, istraživača saradnika. (skenirani dokument u Prilogu A)

Tokom realizacije naučnih projekata kandidatkinja je aktivno učestvovala u realizaciji naučne saradnje Tehnološko-metalurškog fakulteta sa drugim institucijama u zemlji i inostranstvu.

- Posebno je značajna naučna saradnja sa Département des sciences du bois et de la forêt, Université Laval, Québec, Canada u okviru koje su objavljena tri rada ranga M21 (3M21), objavljen rad u međunarodnom časopisu (1M23), kao i saradnja sa NILPRP-The Laser-Surface-Plasma Interactions Laboratory, National Institute for Laser, Plasma, and Radiation Physics u Bukureštu, Rumunija, u okviru koje su ostvarena tri studijska boravka. Kao rezultat iz ove oblasti istraživanja objavljen je jedan rad u vrhunskom međunarodnom časopisu (1M21) i jedan rad u istaknutom međunarodnom časopisu (1M22). Od 2013. godine započeta je saradnja sa laboratorijom Prof. Kyong Yop Rhee, Department of Mechanical Engineering, Kyung Hee University, Seul, Južna Koreja. Ova saradnja je veoma plodna i rezultirala je velikim brojem publikovanih radova i to dva rada u međunarodnim časopisima izuzetnih vrednosti (2M21a) i četiri rada u vrhunskom međunarodnom časopisu (4M21), kao i po jednog rada u istaknutom međunarodnom časopisu (1M22) i međunarodnom časopisu (1M23). Od posebnog je značaja uticaj i iskustvo koje je dr Ana Janković prenela na mlade saradnike u realizaciji, prezentovanju i publikovanju naučnih rezultata.

5.3. Kvalitet naučnih rezultata

5.3.1. Uticajnost, pozitivna citiranost, ugled i uticajnost publikacija u kojima su kandidatovi radovi objavljeni

- U svom dosadašnjem naučno-istraživačkom radu dr Ana Janković je nakon poslednjeg izbora u zvanje objavila 2 rada u međunarodnim časopisima izuzetnih vrednosti (**2M21a**), 7 radova u vrhunskim međunarodnim časopisima (**7M21**), dva rada u istaknutim međunarodnim časopisima (**2M22**), 1 rad u međunarodnim časopisima (**1M23**) i jedan rad u međunarodnom časopisu van SCI liste. Ukupna citiranost kandidata iznosi 281, odnosno **252 bez autocitata** (oktobar 2017.), izvor: Scopus . Prema istoj indeksnoj bazi **Hiršov indeks je 8**. Pozitivna citiranost radova kandidata ukazuje na aktuelnost, uticajnost i ugled objavljenih radova.
- Rad dr Ane Janković objavljen u vrhunskom međunarodnom časopisu **Biochemistry-US** citiran je 83 puta, uglavnom u vrhunskim međunarodnim časopisima, uključujući i citat u časopisu **Science** (Multidisciplinary Sciences (2/56), IF(2011)=31.201, ISSN 1095-9203), **Nat Struct Mol Biol** (Biochemistry & Molecular Biology (8/290), **Biophysics** (2/74), **Cell Biology** (12/181), IF(2011=12.712, ISSN 1545-9985) i **Structure** (Biophysics (8/74), **Cell Biology** (35/181), Biochemistry & Molecular Biology (38/290), IF(2011= 6.347, ISSN 1359-0278). Dr Ana Janković objavila je 2 rada u **Compos Part B-Eng** (Materials Science, Composites, 2/25, IF (2016) = 4,727), 2 rada u **J Ind Eng Chem** (Chemistry, Multidisciplinary, 32/166, IF (2016) = 4.421), 1 rad u **J Alloy Comp.**(Materials Science, Multidisciplinary, 58/271, IF (2015) = 3,014), 1 rad u **Prog Org Coat** (Materials Science, Coatings & Films, 3/18, IF (2015) = 2,632), 1 rad u **Appl Surf Sci** (Materials Science, Coatings & Films, 2/17, IF (2014) = 2,711), 1 rad u **Int J Mol Sci** (Chemistry, Multidisciplinary, 46/157, IF (2014) = 2,862), 1 rad u **Mater Chem Phys** (Materials Science, Multidisciplinary, 48/232, IF (2011) = 2,385), 1 rad u **J Phys Chem B** (Chemistry, Physical, 32/134, IF (2011) = 3,696), 1 rad u **J Mater Sci-Mater M** (Engineering, Biomedical, 21/72, IF (2014) = 2,587), 1 rad u **Carbon Lett** (Materials Science, Multidisciplinary, 124/260, IF (2014) = 1,625), 1 rad u **Bulg Chem Commun** (Chemistry, Multidisciplinary, 163/166, IF (2016) = 0,238), 1 rad u **J Serb Chem Soc** (Chemistry, Multidisciplinary, 102/152, IF (2011) = 0,879), kao i 1 rad u **Eurasian Chemico-Technological Journal** (van SCI liste).

5.3.2. Efektivan broj radova i broj radova normiran na osnovu broja koautora, ukupan broj kandidatovih radova, udeo samostalnih i koautorskih radova u njemu, kandidatov doprinos u koautorskim radovima

- Dr Ana Janković je u dosadašnjem naučno-istraživačkom radu publikovala 34 bibliografske

jedinice i to: 15 naučnih radova u uticajnim međunarodnim časopisima i 15 saopštenja na međunarodnom nivou, kao i 4 saopštenja na nacionalnom nivou. Prosečan broj autora po radu za ukupno navedenu bibliografiju iznosi 8,2. Dr Ana Janković je bila prvi autor na 2 rada u vrhunskom međunarodnom časopisu, 1 radu u istaknutom međunarodnom časopisu, 1 radu u međunarodnom časopisu i 2 saopštenja na međunarodnim skupovima.

5.3.3. Stepen samostalnosti u naučnoistraživačkom radu i uloga u realizaciji radova u naučnim centrima u zemlji i inostranstvu

Dr Ana Janković je tokom dosadašnjeg naučno-istraživačkog rada pokazala visok stepen samostalnosti u idejama, kreiranju i realizaciji eksperimenata, obradi rezultata i pisanju naučnih radova, koji se u najvećem broju odnose na fizičko-hemisika i biološka ispitivanja svojstava materijala. Rezultate svojih istraživanja je sistematski analizirala, objasnila i publikovala u uticajnim međunarodnim časopisima.

Sumarni prikaz dosadašnje naučno-istraživačke aktivnosti

| Kategorija rada | Koeficijent Kategorije | Broj radova u kategoriji | | Zbir | |
|---|------------------------|--------------------------|--------------|---------------|--------------|
| | | ukupno | posle izbora | ukupno | posle izbora |
| Radovi u međunarodnom časopisu izuzetnih vrednosti (M21a) | 7,14 - 8,33* | 2 | 2 | 15,47 | 15,47 |
| Radovi u vrhunskim međunarodnim časopisima (M21) | 3,64 - 8* | 9 | 7 | 55,42 | 43,04 |
| Radovi u istaknutom međunarodnom časopisu značaja (M22) | 1.79 - 4.17* | 2 | 2 | 5.96 | 5,96 |
| Radovi u međunarodnom časopisu (M23) | 3 | 2 | 1 | 6 | 3 |
| Radovi saopšteni na skupovima međunarodnog značaja štampani u izvodu (M34) | 0.21 – 0.5* | 15 | 11 | 6,09 | 4,28 |
| Radovi saopšteni na skupovima nacionalnog značaja štampani u izvodu (M64) | 0,17– 0.2* | 4 | 3 | 0,77 | 0,57 |
| Odbranjena doktorska disertacija (M71) | 6 | 1 | 0 | 6 | 0 |
| Tehničko rešenje-prijavljen patent na nacionalnom nivou (M87) | 0,5 | 2 | 2 | 1 | 1 |
| Patenti-objavljen patent na nacionalnom nivou (94) | 7 | 2 | 2 | 14 | 14 |
| Nagrada na izložbi (104) | 2 | 3 | 3 | 6 | 6 |
| Ukupan koeficijent | | | | 116,71 | 93,32 |

* Usled normiranja naučnih radova po broju koautora po formuli $K/(1+0,2(n-7))$, koeficijenti (K) za radove u kategoriji M21a (koeficijent kategorije je 10) Ane Janković su redom: 8,33; 7,14; dajući zbir od 15,47.

Koeficijenti (K) za radove u kategoriji M21 (koeficijent kategorije je 8) Ane Janković su redom: 5,71; 5; 8; 5; 3,33; 8; 8; 6,67; 5,71 dajući zbir od 55,42.

Koeficijenti (K) za radove u kategoriji M22 (koeficijent kategorije je 5) Ane Janković su redom: 1,79; 4,17; dajući zbir od 5,96.

Koeficijenti (K) za radove u kategoriji M23 (koeficijent kategorije je 3) Ane Janković su redom: 3; 3; dajući zbir od 6.

* Usled normiranja naučnih radova po broju koautora po formuli $K/(1+0,2(n-7))$, koeficijenti (K) za radove u kategoriji M34 (koeficijent kategorije je 0,5) Ane Janković su redom: 0,42; 0,5; 0,5; 0,31; 0,5; 0,5; 0,28; 0,21; 0,28; 0,28; 0,5; 0,5; 0,31; 0,5 dajući zbir od 6,09.

* Usled normiranja naučnih radova po broju koautora po formuli $K/(1+0,2(n-7))$, koeficijenti (K) za radove u kategoriji M64 (koeficijent kategorije je 0,2) Ane Janković su redom: 0,2; 0,2; 0,17; 0,2; dajući zbir od 0,77.

Uslov za izbor u zvanje viši naučni saradnik za tehničko-tehnološke i biotehničke nauke, koje propisuje *Pravilnik o postupku, načinu vrednovanja, i kvantitativnom iskazivanju naučnoistraživačkih rezultata istraživača*, je da kandidat ima ukupno najmanje 50 poena koji treba da pripadaju sledećim kategorijama:

| | | | |
|--|---|-----------|--------------|
| Diferencijalni uslov - od prvog izbora u prethodno zvanje do izbora u zvanje | Potrebno je da kandidat ima najmanje 50 poena, koji treba da pripadaju sledećim kategorijama: | Neophodno | Ostvareno |
| Viši naučni saradnik | Ukupno | 50 | 93,32 |
| Obavezni (1) | M10+M20+M31+M32+M33+M41+M42+M51+M80+M90+M100 | 40 | 88,47 |
| Obavezni (2)* | M21+M22+M23+M81-83+M90-96+M101-103+M108 | 22 | 81,47 |
| | M21+M22+M23 | 11 | 67,47 |
| | M81-83+M90-96+M101-103+M108 | 7 | 14 |

***Napomena:** Za izbor u naučno zvanje viši naučni saradnik, u grupaciji "Obavezni (2)", kandidat mora da ostvari najmanje 11 poena u kategorijama M21+M22+M23 i najmanje sedam poena u kategorijama M81-83+M90-96+M101-103+M108.

Kandidatkinja ispunjava kvantitativne uslove za izbor u zvanje Viši naučni saradnik za tehničko-tehnološke i biotehničke nauke, koji su propisani navedenim Pravilnikom.

ZAKLJUČAK

Na osnovu detaljne analize dosadašnjeg naučno-istraživačkog rada i ostvarenih rezultata, dr Ana Janković, dipl. inž. tehnologije, je pokazala izrazitu sklonost i sposobnost za bavljenje naučno-istraživačkim radom i ispunjava sve uslove neophodne za sticanje zvanja **VIŠI NAUČNI SARADNIK**. Stoga, sa zadovoljstvom predlažemo Nastavno-naučnom veću Tehnološko-metalurškog fakulteta u Beogradu da ovaj izveštaj prihvati i isti prosledi odgovarajućoj komisiji Ministarstva prosvete, nauke i tehnološkog razvoja Republike Srbije na konačno usvajanje.

U Beogradu, 19. oktobar 2017.

ČLANOVI KOMISIJE

Dr Vesna Mišković-Stanković, redovni profesor
Univerziteta u Beogradu, Tehnološko-metalurški
fakultet

Dr Jelena Bajat, redovni profesor
Univerziteta u Beogradu, Tehnološko-metalurški
fakultet

Dr Maja Vukašinović-Sekulić, vanredni profesor
Univerziteta u Beogradu, Tehnološko-metalurški
fakultet

Dr Maja Obradović, naučni savetnik
Univerziteta u Beogradu, Institut za hemiju,
tehnologiju i metalurgiju
