

Le Bélier is a global group specialized in the manufacture of molded aluminum safety components for cars. Le Bélier group is one of the largest independent suppliers of the aluminum cast parts for the global car industry.

Located on three continents, with more than 2.500 employees, Le Bélier group has one plant in Serbia, one in France, three in Hungary, two in Mexico and two in China specialized in three products family: braking components, air intake and chassis-structure.

Le Bélier has been successfully operating in Serbia, Kikinda since 2003. Due to continued progress of our plant, we are looking for candidates for the following program:

FOUNDRY SCHOOL PROGRAM

(based in Kikinda)

Foundry School project is launched in September 2015

- It is established in order to develop and train young students from metallurgy faculties
- The goal is to develop Production Technicians with potential for future international career inside the Le Belier group
- Currently 4 students are following the program succesfully.

In order to prepare 2nd generation of Foundry school students in 2016, we are launching new recruitment process of young talents.

If you are student from Metallurgy or Chemical engineering department interested to discover more about Foundry School development program,

please come on **May 26th, 2016** at **14h** in Congress hall on the 3rd floor (Svečana sala) where you can hear everything about Le Belier, Foundry school program details and package we offer to the best candidates.
